

## ***Sliding Door Hardware***

---

We offer an extensive line of commercial, industrial and residential sliding door hardware from over 15 different manufacturers from Europe and the USA, including top manufacturers Richards-Wilcox, MWE, P C Henderson, Pemko and Coburn Hardware. Find I-beam track, box track, and bypass sliding door hardware with and without fascia. We provide fast, friendly service from initial specification to shipment of your sliding door hardware.

We have everything from aluminum carbon steel and stainless steel to handle glass, wood and steel doors. Our flat track hardware has been used in many lofts and condominiums because of its unique look and affordability. For the modest price of some barn door hardware, our sliding door hardware has transformed the door industry with the most beautiful stainless steel hardware.

### **Flat Track Hardware**

Flat track sliding door hardware installation involves the installation of a track along a surface. A sliding door attachment is added to create an operable door that looks great and is 100% functional. Flat track sliding doors are perfect for indoor or outdoor settings and the hardware that we offer is durable and stylish enough to use anywhere within a large building or in a home. All of our products come with a

20 year iron clad warranty.

### **Tubular Track Sliding Door Hardware**

- High quality stainless steel.
- 4" hubless bearings.
- Holds up to 400 lbs.
- System includes track, two trolleys, bottom guide post, and mounting hardware.

**Barndoorthardware.com was formed in 1996 by a group of seasoned door professionals.**

We used the domain name of Barndoorthardware.com because there is no one, all inclusive term for the variety of products we specialize in.

We used the domain name of Barndoorthardware.com because there is no one, all inclusive term for the variety of products we specialize in.

To some this hardware is called “Barn Door Hardware”, to others its “Industrial Hardware”, “Slide Hardware” or even “Heavy Duty Door Hardware”. The fact is that this site is dedicated to those hard to find and even harder to get expert support on unique hardware accessories.

### **Bookcase Doors by Woodfold**

Distinctly attractive and extremely functional, Woodfold's Bookcase Door System offers a smart, space-saving option for everything from closets, pantries and wall safes in homes, to private areas and divided rooms in schools, banks and offices.

A perfect fit for both residential and commercial applications, it is custom-crafted for strength, able to support up to 500 pounds.

### **Curved Door Track Hardware**

A special curved sliding door track can be fabricated to conform to practically any radius.

With trolley capacities of 700 lbs. each, our ball bearing, and double shielded, prefabricated rollers are designed for a minimum service life of 2500 hours of operations.

### **Automated Sliding Door Hardware**

- Door Speed Approximately 7" Per Second

## Gearhead Slide Door Operator

- High Starting Torque Motor, Removable without affecting Limit Switch Setting
- Full Overload Protection
- 24 VAC Control Circuit
- Heavy Duty, Full Voltage, Reversing Contactor
- 3 Button NEMA 1 Control Station Included
- Pre-wired for 3 Button Station, Pull Cord Station, and Automatic Reversing Equipment

## Axel Sliding Door Hardware

AXEL was designed to meet the needs of customers who want Specialty Doors' modern design esthetic but also need a high quality product that can ship quickly, be customized on site, and is available at a price that is more accessible for projects requiring multiple systems.

AXEL is Specialty Doors' interpretation of the original flat track sliding barn door hardware that has been in use for over 100 years. AXEL utilizes the same raw steel material and flat track as those original systems, but has been designed to be quieter, safer, and more durable.

And because AXEL is made from steel, you can easily cut and drill the track at the project site to customize it to your needs. That means you don't need to have all the answers before you order it, and it doesn't have to be cut and drilled before it leaves Specialty Doors.
